

Overview

Coding is when you make a set of instructions for the computer to follow.

Jit5 Turtle is a type of on screen coding software. There are many different types. These work similar to a Beebot robot.

In Year 2 we use ADVANCED mode.

You will plan a program and create a sequence of instructions to complete a given task. You will then test and debug your program to make sure it works properly.

You can see your sequence of instructions in the command box on the left of your screen.

Click the asterick to choose the different themes

Jit5 Turtle Commands

Concepts

PROGRAM

- list of instructions which tells the computer exactly what to do

DEBUG

- find and fix mistakes in a computer program
