Overview

A simulation is computer software that lets you 'pretend' to try out something that would be too dangerous, difficult or expensive to try in real life.

Why do we use simulation in real life?

DANGER

HARD

Important camera tools

'Racing car driving' game

'Looking after a pet' game

'Make a Cake' game

'Building a hamster run' game

'Living on an island' game

simulation   game   difficult   expensive   dangerous
