

We are confident.
We are inquisitive.
We are scientists.

Science Vocabulary of the Week

animal

An animal is a living thing. Animals need food and water to live. Animals feed themselves by eating plants or other animals. Animals can also sense what goes on around them. Their bodies allow them to move in reaction to their surroundings. Millions of different kinds of animals live on Earth. Animals are found throughout the world, from the freezing polar zones to the hottest deserts. They live on land and in the water. They come in a huge variety of shapes and sizes.
