

What is computing?

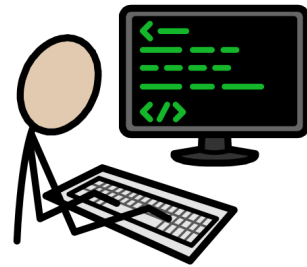

Computing is finding out how computers work.

It teaches us how to use computers to solve problems in a safe, efficient way.

digital
literacy

Using computers
safely, respectfully
and securely.

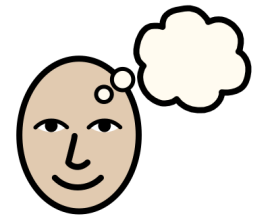

computer
science

Learning how
computers work and
how they use data
to control robots and
programs.

information
technology

Using digital tools
to create, edit and
share content like
art, text and music.

computational
thinking

Problem solving to
write, test and
debug code to
solve problems.
